ENGINE DESIGNER

Engine Block Material

Engine Blocks can be made of a variety of materials, most commonly Cast Iron. The choice of Engine Block Material determines its strength, cost to manufacture and weight. Materials are a compromise of all these factors.

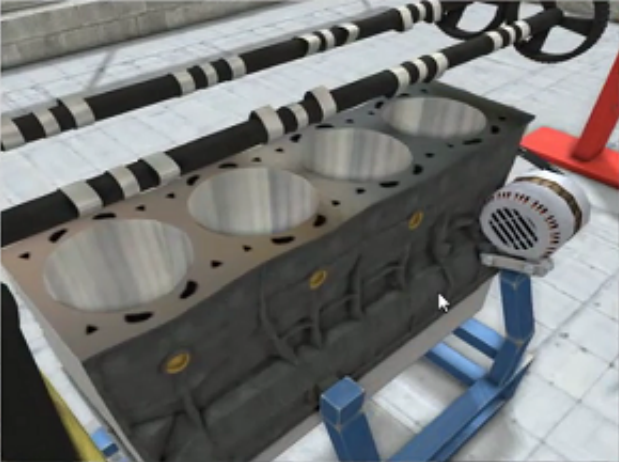

Cast Iron

An Engine Block cast from iron, the most commonly used Engine Block Material. Cast iron is the cheapest and simplest material to manufacture a block. Due to its intrinsic material properties it is easier to manufacture a strong, durable block. Although, the same properties make it a comparatively heavy choice.
